Bonded DSL

Combine multiple ADSL connections to create a faster single connection over standard telephone lines offering improved bandwidth, resilience and reliability for your business. Bonded DSL provides a significant performance improvement over standard ADSL and a cost-effective alternative to Leased Lines, especially in areas where FTTC is not yet available.
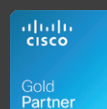

How Bonded DSL works

Unlike many combined solutions, our service bonds up to four standard ADSL lines together using an aggregated connection to take advantage of the combined speed of all four lines. We provide pre-configured routers that effortlessly combine these multiple lines enabling you to manage your connection as a single line.

Virtual Tunnel for IP Traffic

BT   ISP   Eclipse Bonded DSL Aggregator

Computer or Network   **Routers**   **Local Exchange**   **The Internet**

*up to 10% throughput can be lost when bonding multiple lines

How Bonded DSL will benefit your business

Cost-effective
Up to 70% cheaper than a Leased Line with the added benefit of no expensive install costs.

Increased speed
Combined lines can offer speeds of up to 80Mb download and 4Mb upload to improve business productivity. Ideal for supporting high-bandwidth applications, file transfers and cloud hosted services.

Enhanced resilience
By combining ADSL lines, even if a line fails, your connection will remain and your service will continue.

Advanced monitoring
Private, dedicated access to our portal allows complete control over your bandwidth. Prioritise traffic, configure firewalls and receive detailed status updates to make sure that your connection works perfectly for you.

Rapid provisioning
We'll get your service up and running quickly, without your business losing service during installation.

Flexibility
Simply add or remove lines as your business requirements change. Service contracts are available for 12 month periods to suit the way your business works.

FTTC alternative
Many areas of the UK don't have access to FTTC, whereas our Bonded DSL solution is readily available throughout the whole of the UK.

Pricing

Monthly usage	2 bonded lines	3 bonded lines	4 bonded lines
50GB	£90	£125	£160
