

KCOM

FootAnstey

“ *The level of support and connection management that KCOM provides ensures that we can operate efficiently and effectively, meeting the needs of our clients.* ”

Foot Anstey were looking for a technology partner to truly understand the needs of their business and provide the right level of account management. The level of support and connection management that KCOM provides ensures that we can operate efficiently and effectively, meeting the needs of our clients.

Connecting offices across the South West

Foot Anstey has chosen KCOM as their exclusive technology partner to provide and manage a wide area network to connect their five sites across the South West.

Benefits of the solution include:

- Absolute assurance of service continuity and performance
- Improved network performance and faster download speeds
- A network that can support communication and collaboration across sites
- Access to online performance monitoring and diagnostic tools

When looking for a partner, the 'chemistry' was really important to Foot Anstey; a like-minded company that could provide an excellent level of account management together with support and service enhancements throughout the life of the relationship. KCOM stepped up to the bar and now, with monthly and quarterly service reviews, the team at Foot Anstey feels fully supported and in control of their own network and future.
