1.2 Service Details

Site environment

Hosted Messaging and Collaboration Services are offered from any of our Data Centres. Physical access to each of the Data Centres is strictly controlled. The Data Centres are continuously monitored using 24-hour security guard surveillance and closed-circuit television (CCTV). The Data Centres environment is rigorously controlled. Customers are not allowed physical access to the Hosted Messaging and Collaboration platforms.

Hardware Maintenance

We are responsible for maintaining the equipment and the network at our Data Centres. Should any server downtime be required, for instance to replace faulty hardware, we will notify you via the Status Page on the portal. Our Service includes repair and replacement of any defective hardware, in addition to the installation of any hardware upgrades. Software maintenance includes upgrades to the operating system and other supporting system software. Any scheduled maintenance will normally be notified to you via the Status Page on the portal at least 24 hours in advance of it taking place.

Security Updates

All Microsoft operating systems and applications are fully tested and hardened for security as advised by Microsoft before being released into an operational environment. Additionally, all software and system updates will be carried out by us. We reserve the right to install updates to the servers without prior consultation should a security issue be identified that could threaten the integrity of the hosted servers or of the KCOM Group network itself. Where at all possible, we will advise you when we will apply these updates if it will affect your service

Backup and Restore - Exchange

We do not backup individual mailboxes as standard. We do operate a 7 day mail retention policy which allows you to restore deleted mail using the standard Microsoft Outlook Recover Deleted Items tool for up to 7 days. If you require additional backup features then you may choose our Exchange Archiving solution.

Backup and Restore - SharePoint

All SharePoint data is backed up on a daily basis and retained for 7 calendar days. This is included with the service. We are able to restore data up to 7 days old upon request. This is a chargeable service.

Service Access

To access the Hosted Messaging and Collaboration Services, you must provide at the very minimum: an Internet connection with sufficient bandwidth and quality; the network connection should not impede Microsoft Exchange or SharePoint functionality; Microsoft Internet Explorer 6.0 or above; Microsoft Outlook 2003

software (available from us for each Exchange user, if required) and Microsoft Windows XP with service patch 2.0 applied for each user who will connect directly to the Exchange server.

Mail limits and delivery

Inbound and Outbound emails are limited to 10MB in size.

The Exchange server uses SMTP to deliver outbound messages. This protocol does not guarantee immediate delivery of email messages. By default, the Exchange server makes a delivery attempt every ten minutes three times; after that the server will attempt message delivery every fifteen minutes. If there is no successful delivery attempt within twelve hours, a delay notification will be emailed to the sender. If there is no successful delivery attempt within two days, the message will be returned to the sender.

Mobile Wireless access

If Windows Mobile access or Blackberry mobile access is provided as part of the service, success in configuration and setup of the wireless access is dependant upon the device and wireless access provider chosen by you. We can therefore only support you within reasonable limits for these devices.

Archiving

Archiving of individual mailboxes is available as a chargeable option. Accessed via the Microsoft Outlook Client this allows policy-based archival of all email attachments and calendar items. Mailboxes archives are of unlimited size. However, any single mailbox archive should not exceed 25Gb. If usage exceeds this fair usage policy, we may exercise our rights as detailed in clause 7.4 of the terms and conditions.

Data Retention

All customer data is deleted immediately upon termination of the account.

Storage Limits

Storage limits are decided by the customer and set at the time of purchase for each service. Once these limits are reached then the service will no longer; send or receive emails in Exchange or save further data in SharePoint. It is not our responsibility for any service unavailability or data loss caused by exceeding the storage limits.

Anti Spam / Virus

All email is passed through our Anti Spam and Virus service using third party filtering rules. We are not responsible for lost or corrupted messages due to Anti Spam filtering.

Passwords

We have a strong password policy in place for the Hosted Messaging and Collaboration Services. All passwords must be at least 8 characters long and contain a mix of alphanumeric and symbol characters. We do not expire passwords. However, we strongly recommend that you regularly change your passwords in order to protect the security of your information. We do not have the ability to retrieve your password if lost or stolen; but we can reset it in such circumstances.

3.2 Restrictions

(a) Planned Outages

Planned Outages caused by the carrying out of any planned Maintenance Services on the KCOM Group Network or on any of our equipment previously notified to you shall not be deemed occurrences of unavailability for the purposes of calculating Service Availability under this Service Standard. Planned outages may occasionally be necessary for us to carry out essential Maintenance work or network upgrades, these will be kept to a minimum.

Except in an emergency or when circumstances are beyond our reasonable control, we will give you at least 24 hours prior notice of all planned maintenance via the Status Page on the portal

(b) Customer Responsible Faults

Outages which are the result of Customer Responsible Faults shall also not be included when calculating the Service Availability. In the event that a Fault is identified as being attributable to the action of the Customer, employees or agents of the Customer, the Fault shall be deemed the responsibility of the Customer. Any service unavailability shall not be included in the Service Availability calculation.

7. When the Fault is resolved, we will confirm to you that the Fault has been resolved and obtain your agreement to close the Fault.

4.2 Fault Escalation

Fault escalation procedures can be invoked in the following situations:

- If a reported Fault exceeds the TTRF
- Where an individual Fault condition is particularly sensitive and is deemed to be business affecting and a quicker resolution may be necessary.

You may at any time during the Fault request immediate escalation. Escalation may be via the appropriate KCOM Group contact or on a direct peer to peer level. All requests are to clearly state the reason for escalation and any subsequent actions will be recorded on the KCOM Group Fault management system. The TTRF period shall begin once you notify the Technical Support Centre of the fault and a Fault Reference Number is provided to you. The TTRF period shall cease upon notice to you by the Technical Support Centre of resolution of the fault. Table 3 – Service Credits

The figures in brackets are provided for reference only and represent the approximate amount of downtime to the nearest hour for which the relevant Service Credit is payable.

6.2 Fault Management

In the event that we fail to meet the TTRF for Service Affecting Faults, except for Restrictions mentioned above, you have the right to claim service credits as detailed in Table 4.

7 DEFINITIONS

Customer Responsible Faults

In the event that a Service Affecting or Non-Service Affecting Fault is identified as being attributable to Customer Equipment, customer network, software, content, any actions or omissions of you or your employees or agents the fault shall be deemed your responsibility. Any service unavailability shall not be included in Service Availability calculations.

Fault Reference Number

The unique number issued when logging a fault with us.

Non-Service Affecting Fault

A fault or condition which is not a Service Affecting Fault.

Planned Outage

All necessary equipment maintenance or network upgrades will, wherever possible, be planned to avoid any interruption to the provided Service. In general planned work would be scheduled at low traffic periods to minimise any disruption.

Except in an emergency, or when events outside our control do not allow, We will provide 24 hours notice to You of any planned works that will affect the availability of the service via the Status Page on the portal. All maintenance operations are controlled by internal procedures. All notifications will be notified to you via the Status Page on the portal. Any planned downtime shall not be included in fault or Service reliability measurements.

Service Affecting Fault (SAF)

Any failure of the Service, the KCOM Group equipment or network, which materially affects your Use of the Service. For the avoidance of doubt, temporary inability to access individual Exchange mailboxes will not normally constitute a Service Affecting Fault, however significant or global outage of a proportion of 10% or more of an organizations active mailboxes (excluding archiving mailboxes) will normally qualify. In such cases the length of downtime will be recorded by Us from when the Fault is registered either by You or Us.

Service Measurement Period

Service Availability for the purpose of this contract shall be measured as the availability of the Service over a 30 day month or 720 hours in a month.

Service Availability

The time for which our Service is usable, expressed as a percentage of the time during the Service Measurement Period. A Service shall be deemed available for the purposes of calculating Service Availability if it is not usable due to an event outside of our control (including any Force Majeure Events), a Customer Responsible Fault, a Third Party Attributable Fault or is due to a Planned Outage.

For the avoidance of doubt, a Force Majeure Event includes denial of service attacks, mail bombing and other flooding techniques.

The following formula shall be used to calculate the Service Availability figure:

$$\text{Availability \%} = \frac{H - zh}{H} \times 100$$

Where: H is the number of hours in a month, being 720 hours on the basis of a 30 day month; and

zh is the number of hours (or part hours) during which the Service is unavailable.

Downtime commences when the Fault has been logged and time stamped on the fault tracking system and the unique ticket number has been given to the customer and concludes when both parties agree that the fault has been cleared (see Restrictions).

Time To Resolve Fault (TTRF)

The length of time from the issue of the Fault Reference Number to restoration of the Service.

Third Party Attributable Faults

In the event that a Service Affecting Fault is identified as being attributable to a third party (i.e. neither you nor us) downtime shall not be included in Service Availability Measurements. Such faults do not qualify for service credits. We will try to rectify such Third Party Attributable Faults as soon as reasonably practicable.
